

Mountain trip Sweden June 2008  
8 days – 7 nights  
Breath-taking sceneries and charismatic birds  
Combining Västmanland and southern Lapland

A trip combining some of the most charismatic birds and sceneries in Scandinavia. Yet without exhausting driving distances or costly domestic flights. We'll use plenty of time to enjoy the nature and the birds. The trip includes some mountain trekking, no climbing, but you need to be fit. The pace is rather high compared to our birding trips in Svartådalen.

#### Day 1

Arrival: 14:50 to Västerås Airport

Meet & great stop with coffee/tea and sandwiches by a small wetland surrounded by Oak forest. We look at **Slavonian Grebes** and hopefully newly arrived **Icterine Warblers**.

**Ortolan Bunting** excursion.

**Great Grey Owl & Pygmy Owl**- evening excursion.

Dinner & Night at Fläckebo B&B

#### Day 2

Breakfast

Early Woodpecker morning with **Wrynecks**, **Three-toed-**, **Grey-headed-**, and **Black Woodpeckers**. On top of that we join ringers when they carry out their work on **Tengmalms Owls**.

**Black-throated Divers** and **Goshawk** breeds in the area.

Lunch and short siesta

**Ural Owl** ringing excursion. Outdoor lunch.

Transfer towards Dalarna.

Species like **Red-backed Shrike**, **Thrush Nightingale**, **Common Rosefinch**, can be seen along the way.

Dinner & night at: Tre björnar B&B, Älvdalen (240 km)

#### Day 3

Breakfast and departure for Fulufjället National Park. We follow the boardwalk around the impressive forest and look for **Crossbills**, **Siberian Jay**, **Siberian Tit**, **Wood Sandpiper**. Below an impressive waterfall we stand good chances of seeing **Dipper**, **Rough-legged Buzzard** and **Ring Ouzel**, while we enjoy the scenery. (70 km).

Of course we grab a coffee at the newly established visitors center of the National park. Stunning summer-plumaged **Bramblings** appear all around.

We will spend most part of the morning here and then leave for lunch near a nesting area of **Siberian Tits**. (80 km) **Red-throated** and **Black-throated Divers**, **Common** and **Velvet Scoters**, **Long-tailed Ducks**, **Greenshanks** and **northern Yellow Wagtails** are often seen in or by the lakes along the road.

After lunch we go to Funäsdalen to check in at our accommodation in Tännäs. (100 km) where **Rough-legged Buzzard** often breeds on the rocks just above the hotel.

Dinner and night at: Tännäsgården B&B, Tännäs. (200 km)

#### Day 4

We spend the whole day on different sites on Flatruet (70 km) – a high mountain plateau with interesting high alpine flora and fauna.

The species we'll be searching for are among others **Long-tailed Skua, Willow Grouse** and **Rock Ptarmigan, Dotterel, Snow Bunting, Lapland Bunting, Bluethroats, Red-necked Phalarope, Whimbrel, Temminck's Stint, Ruff, Golden Eagle, Merlin, Rough-legged Buzzard** and **Gyr Falcon**. There will also be mammals like **Reindeer** around.

Outdoor afternoon meal while we scan the mountain sides for raptors and await the **Great Snipe** lekking party to start. **Hawk Owl, Short-eared Owl** and **Hen Harrier** might appear in the area, depending on the lemming-season.

Dinner and night at: Tännäsgården B&B (70 km)

#### Day 5

The weather in the mountains can often prevent birding on the high altitudes. An extra day will be saved for the parts we might not have been able to reach yet. Or we simply enjoy the most beautiful parts an extra time. You just can't get enough of the scenery and the birds up here. Or how about second encounters with plenty of **Bluethroats, Red-necked Phalaropes, Long-tailed Skuas** or immaculate summer-plumaged **Lapland Buntings** and **Dotterels**.

Dinner and night at: Tännäsgården B&B

#### Day 6

This day will be spent mostly in the taiga forest by the feet of the mountains searching for **Parrot Crossbills, Hawk Owl, Siberian Jay, Three-toed Woodpecker, Hazel Grouse** and anything we have failed to see so far. If we didn't see **Gyr Falcon** yesterday we will drive into Norway for a new attempt. (Bring your passports!)

In the afternoon we drive back to Idre.

We visit Nipfjället to look for **Rock Ptarmigan, Ring Ouzel** and **Snow Bunting**. **Golden Eagle** might visit us.

Dinner and night at: Idregården. (119 km)

#### Day 7

Breakfast and optional early morning excursion if we need more time for **Siberian Tit** around the ancient mountainside forests around Nipfjället.

We will be moving slowly south stopping for **Peregrine Falcon, Eagle Owl** and **Blyth's Reed Warbler** if they've arrived yet. If any of the lowland species were missed out before we get a second chance now.

A stop at one of Sweden's most scenic places – Tällberg – overlooking the big lake Siljan is the perfect moment so celebrate with Waffles with whipped cream and cloudberry.

We will arrive to the Black River Valley in late afternoon.

Birdwatching by the wetlands of Lake Fläcksjön with breeding **Black Terns, White-tailed Eagle, Osprey, Common Cranes, Yellow Wagtails** of northern races, **Waders** and more.

Dinner

Optional late night birding in the Black River Valley for wetland birds (**Corncrake, Spotted Crake, Marsh Warbler**, etc.) or last chance to clean-up the Owl section.

Night at Fläckebo B&B, 50 mil transfer. (350 km)

#### Day 8

Breakfast at Fläckebo B&B

Short birding trip by the lake Fläcksjön on request. We look for **Wrynecks, Icterine Warblers, Red-backed Shrike** and **Honey Buzzard**.

Transfer to Airport

Departure at 15.10

Note that: Some of the mountain parts requires rather steep or long walks. Nothing extreme but you need a generally good health for this trip. If you have any difficulties to walk far we can not recommend this trip for you.

Some parts of the mountains might be wet. We recommend you to bring Wellingtons as well as hiking boots. A set of waterproofs is also recommended.

Mosquito repellents can be useful some years, as can also an extra woollen sweater in case of cold weather. The temperature might change a lot this time of the year, from +25 ° C, to below zero.
